

Systems Integrator

TECHNOLOGIES CYSCA is an engineering firm that offers several services. Our fields of application are as varied as transportation, packaging, lighting, mining, personal safety, refrigeration, aerospace, robotics and artificial intelligence. To cope with the growth of our business, we are currently looking for a specialist in information technology.

Are you an IT systems integration expert and ready to participate in the development of a new service? We need you. We are looking for a seasoned candidate with extensive expertise in the following areas: network implementations and support (security, switch and routing and telephony, system administration (Windows, Linux and others), web hosting, storage area network (SAN), NAS) and Azure Cloud and Amazon systems.

Your responsibilities

- Develop and recommend modern technology solutions according to customer specifications.
- Conduct preliminary analyzes in order to offer adapted solutions.
- Actively participate in the integration of solutions from various teams.
- Determine architectural orientations for the choice and implementation of technological solutions for different projects.
- Ensuring the viability of the functionality and integrity of the solution architecture during the delivery, operation and maintenance phases.
- Write the documentation of the procedures and the creation of the site plans and network diagram.

Required requirements

- Bachelor's degree in Computer Engineering, Computer Science or any other relevant field
- Minimum of 10 years of relevant and recent experience, including at least 5 years in systems administration.
- Familiar with DEV / OPS concepts.
- And a combination of experience in the following areas:
- Network (set up, administration, knowledge):
- Systems Administration: (Windows, Linux and other)

- Storage Network (SAN, NAS)
- Have worked with cloud systems such as Azure and Amazon
- Experience building IT solution and Integration
- PC Support (Deployment and Maintenance)

Required skills:

- Excellent interpersonal and customer-oriented skills
- Good ability in problem solving and solution implementation
- Good stress management, autonomy and versatility
- Good organization of work and priority management
- Desire to learn and love being up to date in the field
- Perfectly bilingual
- Available to work at our offices in Montreal and Repentigny and at clients' premises for support

Desirable technical knowledge

- Good knowledge of Windows operating systems (Servers and Clients) as well as Linux (CentOS, Red Hat Enterprise)
- Good knowledge of cloud products such as Amazon and Azure
- Familiar with image and software deployment automation technology systems (SCCM, PXE, Ansible, Chief, Jenkins)
- Good knowledge of solutions and web hosting (Apache, IIS, Proxy)
- Good knowledge of network services such as DNS, DHCP, Active Directory and Radius
- Familiar with Microsoft products such as Exchange, Sharepoint Skype for Business
- Advanced knowledge with network product configuration (Cisco and HP)
- Familiar with infrastructure virtualization technologies (VmWare ESXi, vCenter)
- Good knowledge of client virtualization technologies (VirtualBox, VmWare Workstation)
- Knowledge of data warehousing technologies and SAN concepts (NetApp, FreeNAS)
- Familiar with data warehousing transport technologies (iSCSI, NFS)

This is a full-time permanent position with benefits, competitive salaries, flexible hours and group insurance.
